# Moore Seed Company's Select List of Extra Quality Flower Seeds

**QUALITY—PRICES.** Do not confound our high quality Flower Seeds with the usual imported grades sent out by other houses, which are grown cheap, sold cheap, and are in every way expensive to the buyer. Our seeds are cultivated with a view of obtaining the highest possible mark of perfection and to supply a class of people who want nothing but the very best. We have made the price as low as possible consistent with the high quality of all the seeds herein offered.

We give very close attention to our Flower Seed Department, and we have gone to much trouble and expense to improve the leading specialties, such as

**ASTERS, CINERARIAS, CYCLAMEN, MIGNONETTE, PANSY, PHLOX, PETUNIA, PRIMULAS,  
CALCEOLARIAS, STOCKS, VERBENAS, ZINNIAS**

and many other classes, and they are now grown by the most critical florists in the country.

Purchasers will find our superb mixtures of the above to be of unexceptional merit, which cannot be obtained elsewhere.

**A TRIAL ORDER** will convince any one of the high quality and superiority of our varieties. Florists, especially, will derive great benefit from buying their flower seeds from us.

We allow Florists and Market Gardeners a discount of 33 1/3 per cent. on seeds quoted by the packet. Trade packets, ounces and pounds are net. We do not furnish 1/2 trade packets except where noted. Fractions of an ounce are furnished at a slight advance over the ounce price.

**OUR BUSINESS RULES—About Warranting Seeds, etc.**—THE MOORE SEED CO. give no warranty, express or implied, as to description, quality, productiveness or any other matter of any Seeds, Bulbs or Plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

THE MOORE SEED COMPANY.

**No. 144. ASPARAGUS HYBRIDUS ERECTUS  
FLORIBUNDUS**

This is a plant of great value to the florist and growers of foliage cutting, as it makes splendid material for decoration. In its cut state it will keep fresh for weeks, even without water. It has no leaves. Its cultivation is very simple; it only requires a cool house. There is big money in growing this plant. It produces shoots from 6 to 12 feet long, which grow straight upward without showing the least tendency to wind. By pinching out the tops of the young leaders before the laterals appear numerous side shoots 2 to 3 feet long are easily obtained. When grown in a 5-inch pot 15 to 20 trails or shoots are easily produced. When of sufficient age thousands of snow-white star-like flowers cover the plant and it continues to bloom all the time, making a splendid room or conservatory decoration. Give it a trial. **Pkt. 30c., trade pkt. \$1.00, 100 seed \$3.00, 1,000 seed \$2.00.**

**No. 123. AURORA (NORTHERN LIGHT) SNAPDRAGON**

A grand and valuable novelty, of striking value as a florist cut-flower, possessing the most artistic orchid-like effect. Our new Aurora snapdragon produces quite new shades of colors still enriched by the peculiar tints which nearly all flowers show.

The colorations mostly appearing are as follows:

Creamy white tinted with mauve,

Persian yellow with rose,

**Aurora (Northern Light)  
Snapdragon. No. 123**

**SNAPDRAGON—Continued**

Deep cerise with narrow white lip, Primrose (or lemon) yellow with reddish brown, Pure mauve with darker tints, and with many other shades and colors. They give this type a most charming appearance which bears quite a new but fascinating character, rendering it most valuable as a cut-flower. Semi-dwarf, large flowered type. **Pkt. 25c., trade pkt. 50c.**

**No. 302 EXTRA EARLY FLOWERING FRENCH ASTER—PARIS WHITE**

A truly remarkable early flowering bushy type with flowers nearly double the size of Queen of the Market, of good form, similar to our Japanese Mammoth Flowered Branching Aster. Flowers are bound in long, stout stems. In strong demand for cut flowers. See page 5 for additional sorts. **Pkt. 15c., trade pkt. 40c.**

**No. 282 UNICUM BRANCHING ASTER—SALMON GEM**

It is a most distinct and distinguished-looking flower, being made up of long, thread-like, wonderfully curled quilled petals, which forms an airy, graceful bloom, nicely shown in the illustration. Color same as the incomparable rose Souvenir de la Malmaison. These are of very large size, rarely less than 5 inches in diameter, held erect on long, wiry stems; grows 18 inches high, blooming early; excellent for cutting. This variety will appeal to all florists who want something different from the usual run of Asters. **Pkt. 15c., 2 for 25c., trade pkt. 50c.**

**No. 870-A DRACENA EXCELSA**

This new Cordyline is as readily produced from seeds of the *Dracena indirisa*, is even more ornamental, having longer, wider, thicker leaves of a truer green. All these qualities united can but make this good plant more quickly appreciated. ## SINGLE JAPANESE ASTER

Highly valuable and strikingly handsome new single Asters which bear large star-shaped flowers, resembling those of the lately introduced single-blooming Japanese Chrysanthemums. The yellow central disk is encircled by a wreath of long, quilled ray petals, either white or delicate rose, which lend to the bloom an uncommonly graceful and bizarre aspect. Of branching habit, the plant throws up a large number of strong side-stalks right from the base of the main stem. This places the single Japanese Aster in the very front rank as a florist cut flower, but it can also be used with advantage for late summer bedding.

## NEW ASTERMUM ASTER

## A Splendid New Type Producing Very Large Flowers

A new Aster originating in the State of Illinois; a mid-season variety. The plant grows straight up with strong, sturdy stems, starting near the base and reaching from 18 to 24 inches, and owing to the symmetry of the plant they may be set more closely than other varieties. Each plant yields from ten to fifteen blooms, large and double, which last a long while after being cut. This variety was offered last season for the first time and we received numerous reports of the entire satisfaction it gave.

## MOORE'S GIANT PERFECTION CYCLAMEN

Moore's Giant is a magnificent strain of cyclamen with flowers of extraordinary size and substance, and have gained a national reputation of the highest merit. The leaves are of proportionate size and beautifully marked with gray.

Sow at any time (spring and autumn to be preferred) in pots or pans, in peaty loam and sand, covering the soil scarcely a quarter of an inch, place on warm shelf near the glass in greenhouse, keeping the soil moist but well drained. The seed takes from four to eight weeks to germinate. When the bulbs are the size of a pea transplant singly into small pots, transferring to larger pots as the plants develop. An average of 60° is the temperature best suited for producing well-developed flowers, and good ventilation without draught is a safeguard from disease.

Chrysanthemum, Summer Snowball

Marvelous Daybreak Aster

Begonia Gracilis, White Pearl

## NEW FRENCH CHRYSANTHEMUM

No. 622. Summer Snowball

Valuable alike for forcing in the greenhouse or open air culture as a cut flower. Flowers, pure white, are freely produced, are densely double, and stand up well a long time after being cut. Highly valuable for all classes of cut flower work, the beautiful fern-like foliage makes a fine background for the exceedingly handsome flowers. Pkt. 10c., 3 for 25c., Trade pkt. 40c.

## GAILLARDIA

No. 983. Snowball

Free bloomer, producing great masses of very attractive, large extra double, snow-white, globular flowers. Fifty blooms to a single plant are not uncommon. Long stems, excellent for cutting. Annual. Pkt. 10c., 3 pkts. 25c., Trade pkt. 50c.

Gaillardia, Snowball

No. 309. This new Aster is a midsummer flowering variety, healthy and vigorous in growth, of upright bushy habit and very profuse bloomers—veritable bouquets of flowers—and in consequence are unrivaled for bedding, pot sales or cutting. The flowers—borne on good long, stiff stems—are so very double as to appear almost like balls. The petals, short and narrow, are slightly folded and of durable, lasting substance. While splendid as cut flowers, it is the Aster—par excellence—for our American climate and conditions. Very delicate pink shade. (See illustration.) Pkt. 10c., trade pkt. 40c., oz. 25c.

## COSMOS

New Double Types. These beautiful new Cosmos are most strikingly beautiful in contour and attractiveness. A large percentage come true, and the singles possess attractions distinctly their own. No. 747, Double Pink Beauty. Pkt. 20c., Trade pkt. 40c. No. 748, Double White Queen. Pkt. 20c., Trade pkt. 40c.

## BEGONIA GRACILIS

No. 341. White Pearl

The pure snowy white blooms of this new variety measure quite  $2\frac{1}{2}$  by 1 inch across and appear in large loose clusters well above the bright, pale green foliage, forming a beautiful contrast with it. In habit, size and freedom of bloom, White Pearl closely resembles the beautiful Gracilis Magnifica, a recent introduction of ours, and one which has already gained great popularity everywhere. A white-blooming Begonia has hitherto been lacking in the Gracilis section, our new variety will therefore doubtless prove very valuable for all kinds of decorative work. Begonia gracilis White Pearl has besides the advantage of coming true from seed, and we feel confident that it will establish itself as a valuable variety for every florist. Pkt. 50c., Trade pkt. \$1.00.

## PETUNIA

No. 1714. Moore's Mammoth Flowered, Fringed, Dwarf, Compact

The demand for really good dwarf, compact-growing Petunias has long made itself felt, and now, after several years of patient selection, we are in a position to meet it by introducing an excellent dwarf strain with large fringed flowers of this ever popular plant. These plants only grow about 8 inches high and while branching freely from the base they nevertheless remain quite compact, so that no tying is required. Thus the individual plants make handsome small bushes, on which the numerous flowers borne well above the foliage, appear in all colors common to Petunias. This new dwarf race will doubtless be especially welcome to market growers for pot work, but also prove of great value for the laying out of flower beds and borders. The colors and rich markings are truly charming. Pkt. 25c.,  $\frac{1}{2}$  Trade pkt. 60c., Trade pkt. \$1.00.

Purity Aster

## IMPROVED PURITY ASTER

No. 310. This variety is identical in every way to Daybreak, being of the same symmetrical growth, height and free-flowering qualities; the flowers, however, instead of being pink, are pure glistening white. Are of exquisite form and are produced in great abundance. The plants are extremely vigorous, dark leaves and long strong stems. It makes a superior cut flower, which holds up well after being cut. Pkt. 10c., Trade pkt. 40c., oz. \$2.50.

## ARMERIA

## NEW PANSY

No. 1213. **Tricolor Maxima Hiemalis (Winter-blooming Giant Pansies).** These new Pansies may be announced as an introduction of great importance. Sown at the same time as other Pansies, they begin flowering from four to six weeks earlier than other sorts. The cardinal feature of these plants is an extreme hardiness, which enables them to withstand quite severe winters and to bloom right on into the summer. They have also an appreciable pleasant perfume. On account of their extraordinary early blooming these Pansies are of great value to florists and landscape gardeners. This new giant-blooming earliest class can be warmly recommended. Their markings and colors are very pretty. **Pkt. 25c., Trade pkt. 50c., ½ oz. \$1.00, oz. \$7.00.**

## ARCTOTIS

No. 140. **Grandis (Blue-Eyed African Daisy).** This remarkable novelty is of easy growth, and quickly forms a bush two to three feet across with distinct silvery-white, deeply cut foliage. Each plant produces an immense number of daisy-like flowers which measure two and a half to three inches across, and are silvery-white, with a sky-blue eye surrounded by a narrow yellow zone. The under part of the petals is of lilac-blue. Hardy perennial, fine for cutting. **Pkt. 10c., Trade pkt. 35c.**

The color of the flowers is a lovely golden yellow; at the base of the ray florets, close to the yellow disk, there is a brown zone with silvery-white spots, which is surrounded by a blackish-brown ring. On the reverse each petal bears a brown stripe. When planted on a sunny spot, this plant will bloom incessantly the whole season through. Makes a fine pot plant. **Pkt. 15c., 2 pkts. 25c., Trade pkt. 35c.**

# MOORE'S HARDY PERENNIAL FLOWER SEEDS

## Specially Selected for Florists' Use

Hardy perennials are easily raised from seeds; they may be sown either in spring or during the early summer. The simplest method is to sow them in a frame, protecting the seedlings as they appear above ground from the sun. The soil should be kept evenly moist but not saturated. Transplant the seedlings once or twice if necessary to prevent crowding. We have endeavored to select the varieties best adapted for profitable florist use.
